Experience:

PROCESS TRAINEE: @Prochant (September 2025 – Present)

Trained in Accounts Receivable processes including claim follow-ups, denial analysis, payment posting, and insurance verification. Gained hands-on experience working with US healthcare billing workflows, payer communications, and revenue cycle management tools while meeting quality and productivity standards. Possess good communication skills, a positive attitude, and a strong willingness to grow in a professional environment.

Projects:

ONLINE SWEET SHOP WEBSITE:

Host link: <https://amil.pythonanywhere.com/>

An online e-commerce sweet shop website using Django and Python. It consists of three modules: The admin, user, and the seller where the user can buy products, seller can add and manage products along with viewing the order details. The admin can view and control the activities of both seller and user.

ACCIDENT SPEED DETECTION USING SPEEDOMETER:

Technologies used: Collision Sensors, GPS Module, Microcontroller

Designed and implemented a safety system that detects vehicle collisions and records the speed at the moment of impact by locking the speedometer reading. The system uses collision sensors to detect accidents, captures real-time vehicle location using GPS, and transmits both speed and location data to relevant authorities for immediate response and assistance.

Education
